Asked only to respondents age 18 to 64.

Asked to those who think that there are treatments to help people infected with HIV to live longer.

Percentages are weighted to population characteristics.

Unless stated differently above, Missing, 'Don't know', and Refused responses are excluded.

[#]Use caution in interpreting data for total respondents less than 50. N = Cell Size, NH = Non-Hispanic, %

⁼ Percentage, C.I.(95%) = Confidence Interval (at 95 percent probability level).
